Address	PO Box 40917
City, State, Zip	Olympia, WA 98504-0917
Phone	360-902-3000
Contact	Kay Caromile, Email: kay.caromile@rco.wa.gov

PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

This project will complete final designs to install a series of large wood and rock structures and restore a 75' wide buffer of native vegetation along 600 ft of the Walla Walla River in Walla Walla, WA. The mainstem Walla Walla River is designated a Major Spawning Area (MSA) within WRIA32 for listed Steelhead, Bull Trout and re-introduced Spring Chinook. The limiting factors for this MSA include substrate embeddedness, high temperatures, lack of large wood, and channel confinement. Treatments being proposed include large wood and rock structures, wood barbs created from live trees, riparian tree and shrub planting (including cottonwood), and flood fencing. Objectives of this project are to improve fish habitat through increased instream and riparian roughness and complexity, improved riparian habitat, improved floodplain function, and reduced fine sediments.

Describe existing project site conditions.

Current and past land use is pasture/hayland. The site provides Mid-Columbia steelhead spawning and rearing habitat as well as bull trout winter rearing habitat.

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility E22 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>
